

Zorrito Minerals - AI Knowledge Base Guide

Purpose

Build a single source of truth for all company knowledge so every team member and AI assistant can work from the same information. The goal is consistency, speed, and preserving company knowledge as Zorrito grows.

Recommended Storage

Google Drive as the central repository. Optionally use Notion as the company wiki while keeping all original files in Drive. Share the folders with the whole team.

Recommended Folder Structure

- 01 Company
- 02 Products
- 03 Technical Data Sheets
- 04 Certificates
- 05 Lab Reports
- 06 Mining
- 07 Logistics
- 08 Sales
- 09 Customers
- 10 Marketing
- 11 Pricing
- 12 Photos
- 13 Templates

Customer Subfolders

- Halliburton
- Elecnor
- Pet Valu
- Costco
- Korea
- Distributors
- Oil & Gas
- Construction
- Animal Nutrition

What to Save

- Company profile
- Mission and vision
- Product catalog

- Technical Data Sheets (TDS)
- Safety Data Sheets (SDS)
- Certificates
- ISO documents
- Lab reports
- Mine information
- Production capacity
- Packaging specifications
- Logistics information
- Price lists
- Email templates
- Proposal templates
- Presentations
- Photos and videos
- Freight quotes
- Customer requirements
- Market research
- Competitor research

File Naming Standard

- TDS_GEM_EN_v1.2.pdf
- SDS_Cat_Litter_EN.pdf
- Lab_Report_Bentonite_2026-07.pdf
- Supplier_Package_Halliburton_v3.pdf

AI Workflow

1. Every new document is stored in the knowledge base.
2. Update templates when improved.
3. Upload relevant documents to Claude Projects or ChatGPT when preparing proposals or reports.
4. Never recreate information that already exists; improve and save the new version back into the library.

Long-Term Vision

Over time this becomes Zorrito's institutional knowledge. New employees learn faster, proposals become more consistent, and AI tools produce higher-quality work because they are grounded in your company's own documentation.
