

RETAIL & PRIVATE-LABEL

CAT LITTER SUPPLY PACKAGE

Prepared for pet specialty retailers, distributors and category buyers in Canada

Retail-ready supply CAT LITTER for Canadian pet channels

Branded and private-label programs

Natural mineral litter from Chile

PACKAGING CONCEPT

Final artwork subject to approval

Natural mineral cat litter | Zorrito brand | Private label | Import and distribution programs

Commercial contact: Adrian Ruiz • sales@zorritominerals.com • +1 (604) 220-6382

01 | EXECUTIVE SUPPLIER OVERVIEW

A dependable mineral supply story for the pet-care aisle

Zorrito Minerals International is presenting a scalable cat litter program for Canadian retail, distribution and private-label channels.

Buyer proposition

A natural mineral litter offer built around consistent raw-material access, flexible bag sizes, commercial pricing by program and a transparent path to retail compliance. Zorrito can support branded or buyer-owned packaging, subject to technical validation and final onboarding requirements.

ORIGIN	FORMAT	CHANNEL	CAPACITY
Northern Chile	2 kg / 4 kg / 5 kg	Branded or private label	25 MT/day mineral processing*

**Company-provided raw mineral processing capacity. Finished retail-packaging output and allocation are confirmed per purchase program.*

Why a retailer should review the program

- Direct connection to a Chilean mineral producer with owned deposits and processing operations.
- Flexible commercial routes: Zorrito branded product, retailer private label or distributor program.
- Core shopper benefits: clumping action, odour control, absorption and convenient scoopable cleanup.
- Multiple bag sizes suitable for trial, standard and value-oriented retail assortment planning.
- Clear technical validation plan before launch, avoiding unsupported performance claims.

Recommended first decision

Approve a controlled sample-and-pilot review

The suggested next step is not an immediate national rollout. It is a documented product sample, third-party performance testing, packaging review and a pilot shipment. This gives the buyer reliable data on clumping, dust, absorption, odour control, pallet efficiency and landed cost before committing to scale.

02 | COMPANY PROFILE

From Chilean mineral resources to North American retail programs

Zorrito Minerals International develops commercial opportunities for mineral products produced in Chile. The company reports owned mineral deposits in the Arica and Parinacota region and a processing operation designed to transform non-metallic minerals into value-added products for industrial and consumer applications.

OPERATING PROFILE - Mineral extraction and processing in Chile - Quality-controlled production environment - Export development for Canada and the United States - Portfolio includes bentonite-based and specialty mineral products	RETAIL PROGRAM PRINCIPLES - Consistent specifications before scale-up - Batch traceability and certificate documentation - Accurate bilingual packaging and claims - Commercial terms matched to annual volume and delivery point
---	--

Quality positioning

Zorrito states that its production is managed under controlled quality processes and references an ISO 9001:2000-aligned quality management system. A current certificate, scope and validity should be supplied during retailer onboarding. For the cat litter program, each production lot should be supported by a finished-product Certificate of Analysis based on an agreed specification.

03 | PRODUCT PROGRAM

Natural mineral cat litter designed for easy daily care

A practical scoopable litter concept for mainstream pet retail, with final specifications confirmed through product testing.

Product identity	Natural mineral cat litter / Litière minérale naturelle pour chats
Base material	Processed mineral bentonite feedstock
Consumer format	Scoopable, clumping-style litter; final claim subject to testing
Current bag sizes	2 kg, 4 kg and 5 kg
Brand options	Zorrito brand or private-label artwork, subject to agreement
Country of origin	Chile

Core retail benefits

Clumping convenience	Forms removable clumps around moisture to support easier litter-box maintenance.
Odour management	Mineral adsorption helps control unpleasant litter-box odours; performance level to be validated.
Absorption	Processed mineral granules are intended to capture and retain moisture.
Less product waste	Targeted scooping may extend usable litter compared with full-box replacement routines.
Assortment flexibility	Multiple bag sizes support opening price point, core size and promotional strategies.
Claims discipline	“Low dust,” “99.9% dust free,” “instant clumping,” “multi-cat strength,” “flushable,” “biodegradable,” “non-toxic” and similar claims must not be printed until they are supported by formulation review and appropriate testing.

04 | ASSORTMENT, PACKAGING & PRIVATE LABEL

A modular offer that can fit different retail strategies

Program	Bag size	Positioning	Artwork	Commercial status
Trial / compact	2 kg	Easy-carry / trial	Zorrito or private label	TO CONFIRM
Core retail	4 kg	Primary shelf SKU	Zorrito or private label	AVAILABLE
Value size	5 kg	Value-oriented	Zorrito or private label	AVAILABLE

Packaging configuration to finalize with the buyer

- Bag material and handle format
- Units per master case or shelf-ready tray
- Cases per layer and layers per pallet
- Pallet dimensions, maximum height and gross weight
- Case and pallet labels / SSCC requirements
- English-French artwork and final dealer information
- GTIN/UPC for each consumer SKU and unique identifiers for case levels
- Lot code, production date and traceability format

Private-label support model

Buyer-owned brand option

Zorrito can discuss production for a retailer or distributor brand. Final approval depends on formula specification, packaging artwork, intellectual-property permissions, forecast, order volume, quality agreement and commercial terms. The buyer retains final control over brand claims and design approval.

Recommended shelf message

“Natural mineral litter with dependable clumping, moisture absorption and everyday odour control.”

05 | TECHNICAL SPECIFICATION & VALIDATION PLAN

Separate known raw-material data from finished-product performance

Important distinction

A bentonite raw-material certificate is useful, but retail buyers need a finished cat litter specification. The final TDS and COA must cover the granulated and packaged product actually supplied to stores.

Reference raw-material certificate - example lot

Parameter	Reference result	Interpretation
Moisture	2.95%	Lot-specific raw bentonite result
Apparent density	0.65 g/mL	Raw material reference only
pH	7.83	Near-neutral raw material reference

Reference values are taken from a previously supplied Zorrito bentonite quality certificate. They are not presented as guaranteed finished cat litter specifications.

Finished-product specification required before buyer submission

Test	Reporting unit / method	Current status
Granule size distribution	% retained by sieve	REQUIRED
Finished-product moisture	% by weight	REQUIRED
Bulk density	g/mL or kg/L	REQUIRED
Absorption capacity	g water / g litter or buyer method	REQUIRED
Clump formation time	seconds/minutes	REQUIRED
Clump strength / breakage	agreed test method	REQUIRED
Dust level	gravimetric or buyer method	REQUIRED
Odour-control performance	comparative or panel test	REQUIRED
Foreign material / appearance	visual specification	REQUIRED
Microbiology / heavy metals	risk-based testing as requested	REQUIRED

06 | SUPPLY, LOGISTICS & CONTINUITY

Build the program around forecast visibility and documented lead times

Supply item	Current position	Status
Mineral processing capacity	Up to 25 metric tonnes/day - company-provided	AVAILABLE
Finished packaging capacity	To be scheduled by bag size, equipment and shift plan	TO CONFIRM
Standard minimum order	To be quoted by SKU and delivery model	TO CONFIRM
Production lead time	To be confirmed after packaging and forecast approval	TO CONFIRM
Container loading plan	Units / cases / pallets per container to be engineered	IN PROGRESS
Canadian warehouse stock	Optional phase-two model after demand is established	BUYER-SPECIFIC

Available delivery structures

- FOB Chile: buyer or buyer-appointed forwarder controls ocean freight.
- CIF Canadian port: Zorrito arranges ocean freight subject to quotation and Incoterm agreement.
- Delivered Canadian distribution centre: possible through an import and domestic logistics program after lane and volume validation.
- Private-label contract supply: annual forecast, purchase schedule and packaging inventory managed under a supply agreement.

Continuity controls proposed for a retail agreement

- Rolling 12-month forecast with firm purchase windows
- Safety-stock target for printed packaging
- Approved backup freight route / forwarder
- Batch and shipment traceability from plant to retailer DC
- Quality hold-and-release before shipment
- Written change-control process for formula, granulation or packaging

Commercial principle

Landed pricing should be quoted only after confirming delivery location, annual volume, order frequency, bag size, pallet configuration, Incoterm, customs responsibility and promotional expectations.

07 | CANADIAN RETAIL & COMPLIANCE READINESS

Designed to meet retailer onboarding expectations

For prepackaged non-food consumer products in Canada, mandatory label information includes product identity, net quantity and the dealer name / principal place of business. Required information must be presented accurately, and bilingual requirements apply to key declarations. A valid metric symbol such as “kg” is considered bilingual for the quantity unit.

Readiness item	Status
English-French product identity and instructions	IN PROGRESS
Metric net quantity displayed on principal panel	IN PROGRESS
Canadian dealer / importer name and place of business	BUYER-SPECIFIC
GS1-licensed GTIN / UPC for each SKU	REQUIRED
Accurate, supportable product claims	REQUIRED
Lot / batch traceability code	IN PROGRESS
Finished-product TDS and COA	REQUIRED
Safety Data Sheet for handling review	REQUIRED
Product liability insurance certificate	REQUIRED
Recall and complaint-response procedure	REQUIRED
Retailer supplier code of conduct acknowledgement	REQUIRED
Purchase-order, routing and invoicing compliance	BUYER-SPECIFIC

PetSmart-specific note

PetSmart publishes a Supplier Code of Conduct and purchase-order terms. A product supplier should be prepared to accept retailer-specific ethical sourcing, legal compliance, routing, invoicing and vendor-portal requirements during onboarding.

08 | COMMERCIAL PROPOSAL TEMPLATE

Pricing framework for buyer review

The fields below are intentionally left open until the buyer confirms program requirements. This prevents sending a price that does not reflect freight, packaging or volume.

Commercial item	Buyer requirement	Zorrito proposal
Consumer SKU	[2 kg / 4 kg / 5 kg]	[To quote]
Brand model	[Zorrito / Private label]	[To confirm]
Annual forecast	[Units or tonnes]	[Capacity allocation]
Initial order	[Units / pallets / container]	[MOQ to confirm]
Incoterm / delivery point	[FOB / CIF / Delivered DC]	[To quote]
Wholesale unit price	[Target CAD]	[To quote]
Suggested retail price	[Target CAD]	[Buyer decision]
Retailer gross margin	[Target %]	[Model after price]
Promotional allowance	[Requirement]	[To negotiate]
Payment terms	[Requirement]	[Subject to credit approval]
Launch date	[Target window]	[Feasibility review]

What Zorrito needs to prepare a firm quotation

- Preferred bag size and expected annual volume
- Delivery point or distribution centre postal code
- Private-label or Zorrito-branded artwork route
- Desired cases per pallet and pallet-height limit
- Required launch date and promotional calendar
- Payment terms, chargebacks, deductions and vendor allowances
- Importer-of-record and customs responsibility

Price strategy

For a new retailer, the best offer is a transparent landed-cost model with separate product, packaging, ocean freight, customs/brokerage and domestic delivery components. This makes future freight changes easier to manage and negotiate.

09 | SAMPLE, TESTING & PILOT LAUNCH

A low-risk path from sample to shelf

1	Buyer qualification	Confirm category strategy, bag size, target price, required tests and vendor onboarding process.
2	Technical sample	Provide a representative production sample with raw-material COA and draft product specification.
3	Independent testing	Measure granulation, moisture, density, absorption, clumping, dust and odour performance.
4	Packaging approval	Complete bilingual artwork, GTIN assignment, case/pallet specifications and claims review.
5	Pilot order	Ship a controlled pallet or agreed import quantity for store, e-commerce or regional evaluation.
6	Performance review	Assess sales, returns, complaints, repeat purchase, breakage, dust and DC handling.
7	Scale agreement	Finalize annual forecast, pricing, safety stock, service levels and supply agreement.

Sample request information

Buyer / company	_____
Sample quantity and delivery address	_____
Tests or benchmark brand requested	_____
Target bag size and price point	_____
Expected launch volume / timing	_____

10 | BUYER ONBOARDING DOCUMENT INDEX

Documents included or required for a complete retail submission

#	Document	Action / note	Status
1	Supplier / company profile	Available in this package	AVAILABLE
2	Cat litter product overview	Available in this package	AVAILABLE
3	Raw bentonite quality certificate	Previously supplied; attach latest lot	AVAILABLE
4	Finished-product Technical Data Sheet	Complete after testing	IN PROGRESS
5	Finished-product Certificate of Analysis	Issue for each shipment / lot	REQUIRED
6	Safety Data Sheet	Finalize for retail/warehouse review	REQUIRED
7	Bilingual packaging artwork	Complete after buyer route is selected	IN PROGRESS
8	Packaging, case and pallet specification	Complete after configuration approval	IN PROGRESS
9	GS1 GTIN / UPC confirmation	Assign unique code to each SKU	REQUIRED
10	Product liability insurance	Provide certificate and coverage limits	REQUIRED
11	Recall / traceability procedure	Provide controlled procedure	REQUIRED
12	Factory quality / social compliance documents	Provide current certificates and policies	REQUIRED
13	Commercial quotation	Prepare against buyer forecast and lane	BUYER-SPECIFIC
14	Samples and test reports	Provide before final approval	REQUIRED

Submission rule

Do not send the package as “retail-ready” until the TDS, finished-product tests, bilingual artwork, GTINs, pallet configuration and insurance are complete. Send this version as a supplier introduction and pilot proposal.

11 | BUYER INTRODUCTION & NEXT STEPS

Suggested email to a Category Buyer or Private Label Manager

Subject: Natural Mineral Cat Litter Supply Program - Zorrito Minerals

Hello [Name],

I am reaching out from Zorrito Minerals International regarding a potential cat litter supply program for your Canadian assortment. We produce mineral-based cat litter in Chile and can discuss both Zorrito-branded and private-label formats in 2 kg, 4 kg and 5 kg bags.

Our proposal is to begin with a technical sample and controlled validation program covering clumping, absorption, dust, odour control, packaging and landed cost. We can then prepare a buyer-specific quotation and pilot shipment based on your preferred bag size, forecast and distribution requirements.

Attached is our supplier package. Could you please advise who manages cat litter sourcing or private-label development for your organization?

Best regards,

Adrian Ruiz

Zorrito Minerals International

sales@zorritominerals.com | +1 (604) 220-6382

Recommended next actions

1. Complete finished-product laboratory tests and approve a formal retail specification.
2. Confirm the initial commercial route: Zorrito branded, private label or distributor supply.
3. Engineer the 4 kg case, pallet and container configuration first; add other sizes after validation.
4. Obtain GS1 Canada GTINs and prepare fully bilingual Canadian packaging.
5. Request the retailer's new-product submission form and vendor onboarding checklist.
6. Submit a sample, test report, landed-cost quotation and pilot plan to the category buyer.

Prepared for commercial use

This document is a supplier-introduction package, not a guarantee of retailer acceptance. Product claims, certifications, service levels, prices and delivery commitments remain subject to final documentation and written agreement.
