

ZORRITO MINERALS

DRAFT v0.1 — INTERNAL WORKING DOCUMENT

SUPPLIER PACKAGE

Chile Operations — Mineral Products for Retail, Distribution & Industrial Buyers

Document Status & Readiness Snapshot

HOW TO READ THIS DRAFT

This is a first working draft, assembled from what currently exists in Project Context: the Zorrito Minerals lab test report and sample receipt (Alex Stewart International Chile), product packaging artwork, and mine/processing site photography. It follows the section structure defined in the Creative Brief and the checklist categories from the Supplier Readiness Program.

Sections are marked **CONFIRMED** where content comes directly from a source document, **PARTIAL** where some information exists but key fields are missing, and **PENDING** where no source information exists yet. Nothing in the PENDING or PARTIAL sections has been invented — those gaps are intentional placeholders for the next round of information gathering.

Per the Supplier Readiness Program document: estimated company-wide readiness as of July 2026 is **40–50%**, with a target of 85–90% once the program is complete. This draft reflects that same stage — a working foundation, not a finished buyer-ready package.

Company Information	PARTIAL	Legal entity, address, and primary contact confirmed. History, mission/vision, org chart, export experience not yet provided.
Mining Operations	PARTIAL	Site photography available. Mine location detail, reserve estimates, permits, and production capacity pending.
Processing & Manufacturing	PARTIAL	Facility photography available. Equipment specs, packaging capability, and private-label capability pending.
Product Portfolio	CONFIRMED	Five products identified from packaging artwork with on-pack descriptions.
Quality & Lab Data	PARTIAL	One independent lab assay on file (bentonite). Formal TDS, SDS, COA, particle size, bulk density, absorption, dust level, and pH not yet available.
Commercial & Export	PENDING	No pricing, MOQ, lead time, payment terms, ports, or freight information on file.
Private Label	PENDING	No custom branding, bag, or artwork-approval information on file.
Sustainability	PENDING	Not referenced in any source document.
Contact	CONFIRMED	One verified contact for the Chile entity.

Executive Summary

01 — OVERVIEW

Zorrito Minerals operates in Chile as **ZORRITO SpA Comercializadora**, based in Arica. The company's product range, as shown on current packaging artwork, spans pet-care minerals (natural clumping cat litter, silica crystal cat litter) and industrial minerals (silica quartz, calcium bentonite, and a bentonite-based conductive compound marketed as Mabel Gel+). An independent laboratory assay confirms bentonite as a verified raw material in the company's product line.

This package is being prepared to support supplier evaluation conversations with pet-specialty retail buyers and industrial distributors. It is a working draft: the sections below distinguish what is currently verified from what still needs to be gathered before this can be used in front of a buyer.

Note: the relationship between the "Zorrito Minerals" brand and the "ZORRITO SpA Comercializadora" legal entity is inferred from shared naming and product overlap — not yet explicitly confirmed in any source document. Treat as a working assumption pending confirmation.

About Us

02 — COMPANY PROFILE

FIELD	STATUS
Legal entity	ZORRITO SpA COMERCIALIZADORA CONFIRMED
Address	Puerta de América Mz E Lote 5, Arica, Chile CONFIRMED
Primary contact	Patricia Rojas — p.rojas@zorritospa.cl CONFIRMED
Company history	PENDING
Mission & vision	PENDING
Organization chart / key contacts	PENDING
Export experience	PENDING
Mine ownership documentation	PENDING

Next step: request company history, mission/vision statement, and an organization chart directly from the Chile team, per the Supplier Readiness Program checklist (Section 1).

Mining Operations

03 — SITE OVERVIEW

Site photography below shows extraction and loading activity at a Zorrito mining site. Authenticity and location have not been independently confirmed — please verify these are current, rights-cleared photographs of an active Zorrito site before this package is shared externally.

Site imagery — location, ownership, and shoot date not yet confirmed.

FIELD	STATUS
Mine location	PENDING
Reserve estimates	PENDING
Mining & environmental permits	PENDING
Production capacity & expansion capability	PENDING

Processing & Manufacturing

04 — FACILITIES

Processing and packaging facility imagery — authenticity and location not yet confirmed.

FIELD	STATUS
Processing equipment	Imagery available PARTIAL
Packaging capability	PENDING
Private-label production capability	PENDING

Product Portfolio

05 — CURRENT PRODUCT LINE (FROM PACKAGING ARTWORK)

Cat Litter

Natural mineral litter. Highly absorbent clumping litter. On-pack claims: high absorption, odor control, low dust.

Crystal Cat Litter

Silica crystal litter. High absorption crystals for long-lasting odor control. On-pack claims: high absorption, odor control, low dust.

Quartz

Silica mineral, premium grade, for industrial applications. On-pack claims: high purity, consistent quality, industrial grade. 25 kg net weight.

Calcium Bentonite

Natural mineral clay, for industrial applications. On-pack claims: high swelling capacity, natural mineral, industrial grade. 25 kg net weight.

Mabel Gel+

Ohmic resistance reducer — premium conductive compound for grounding/earthing applications. On-pack claims: fine particle size, high purity, industrial grade. 25 kg net weight.

Product descriptions above are copied directly from packaging artwork. Formal TDS/SDS/COA documentation for each product is still pending — see Quality & Lab Data.

Industries Served

06 — TARGET MARKETS (NOT YET ACTIVE RELATIONSHIPS)

Based on the current product range, two broad markets are implied. These are targeted markets, not confirmed customer relationships — no retailer or distributor agreements are on file.

Pet Specialty Retail

Cat Litter and Crystal Cat Litter products align with the project's named priority buyer targets: Pet Valu, Pet Supplies Plus, Costco, PetSmart, Chewy, Phillips Pet Food & Supplies, and Pet Food Experts. These are prospects, not clients.

Industrial & Energy

Quartz, Calcium Bentonite, and Mabel Gel+ (a grounding/earthing compound) suggest relevance to industrial distributors and engineering/energy companies, consistent with the Creative Brief's target customer list. No named industrial relationships are confirmed.

Quality & Lab Data

07 — INDEPENDENT LABORATORY ANALYSIS

The following results are from an independent laboratory assay performed by Alex Stewart International Chile (ISO 17020 / ISO 9001 accredited), Certificate No. 317_2026, on a calcium bentonite sample (client reference: Bentonita Lote 05122025). Sample received 13-07-2026; results reported 20-07-2026.

This is a raw multi-element mineral assay, not a formatted Certificate of Analysis, Technical Data Sheet, or Safety Data Sheet. It does not include particle size, bulk density, absorption capacity, dust level, pH, or shelf life — all still needed per the Supplier Readiness Program checklist.

Composition Summary (selected results)

PARAMETER	RESULT	PARAMETER	RESULT
Moisture	5.5%	SiO2	54.20%
Al	6.99%	Fe	3.19%
Ca	4.83%	Mg	0.28%
K	1.88%	LOI	8.81%
Na	0.98%	Mn	0.102%

Full trace-element panel (Ag, As, Bi, Cd, Co, Cr, Cu, Mo, Ni, P, Pb, S, Sb, Sc, Se, Sn, Te, Ti, V, Y, Zn) available in the source lab report on request.

Export Capability & Commercial Terms

08 — PENDING

No information on file. Needed: cost/kg, cost/ton, FOB price, CIF Canada, CIF USA, MOQ, lead time, payment terms, export ports, freight partners, container loading plan, Certificate of Origin, Commercial Invoice, and Packing List — per Supplier Readiness Program Sections 4–5.

Private Label

09 — PENDING

No information on file. Needed: custom branding options, custom bag capability, private-label MOQ, and artwork approval process — per Supplier Readiness Program Section 9.

Sustainability

10 — PENDING

Not referenced in any current source document. Not part of the Supplier Readiness Program checklist either — confirm with the team whether this should be added as a new section.

Contact

11 — CHILE OPERATIONS

ZORRITO SpA COMERCIALIZADORA

Contact	Patricia Rojas
Email	p.rojas@zorritospa.cl
Address	Puerta de América Mz E Lote 5, Arica, Chile

A dedicated commercial/export contact for buyer-facing outreach has not yet been confirmed — Patricia Rojas is the only verified contact on file, associated with the lab testing engagement.

Zorrito Minerals — Chile Supplier Package — DRAFT v0.1 — prepared July 2026. Built entirely from verified Project Context materials (lab report, sample receipt, product packaging artwork, site photography). No company history, certifications, manufacturing details, product specifications, or retailer relationships have been invented — gaps are marked PENDING for follow-up. Internal working document; not for external distribution until Company Information, Quality & Lab Data, and Commercial sections are completed.
