

DRAFT v0.2 — A/B STYLE VARIANT

BUILDING FOUNDATIONS WITH Supplier Package

"Chilean mining excellence — delivering high-quality bentonite, quartz, and mineral solutions to industries worldwide." — Zorrito Minerals public positioning statement

Document Status

Assembled entirely from verified Project Context materials — the Chile lab report and sample receipt, product packaging artwork, and site photography. Structured on the Creative Brief's section list and the Supplier Readiness Program's checklist categories.

Executive Summary

02

"Chilean mining excellence — delivering high-quality bentonite, quartz, and mineral solutions to industries worldwide."

— ZORRITO MINERALS, PUBLIC WEBSITE POSITIONING

Zorrito Minerals operates in Chile as **ZORRITO SpA Comercializadora**, based in Arica. Current packaging artwork shows a product range spanning pet-care minerals (natural clumping cat litter, silica crystal cat litter) and industrial minerals (silica quartz, calcium bentonite, and a bentonite-based conductive compound marketed as Mabel Gel+). An independent laboratory assay confirms bentonite as a verified raw material in the product line.

This package supports supplier evaluation conversations with pet-specialty retail buyers and industrial distributors. It is a working draft — sections below distinguish verified information from what still needs to be gathered.

The relationship between the "Zorrito Minerals" brand and the "ZORRITO SpA Comercializadora" legal entity is inferred from shared naming, product overlap, and matching visual identity — not yet explicitly confirmed in a source document.

About Us

LEGAL ENTITY ZORRITO SpA COMERCIALIZADORA	COMPANY HISTORY Pending
ADDRESS Puerta de América Mz E Lote 5, Arica, Chile	MISSION & VISION Pending
PRIMARY CONTACT Patricia Rojas — p.rojas@zorritospa.cl	ORG CHART / EXPORT EXPERIENCE Pending
Next step: request company history, mission/vision statement, and an organization chart from the Chile team — Supplier Readiness Program, Section 1.	

Mining Operations

04

Site imagery — authenticity, location, and shoot date not yet confirmed. Verify before external use.

FIELD	STATUS
Mine location / Reserve estimates	PENDING
Mining & environmental permits	PENDING
Production capacity & expansion capability	PENDING

Processing & Manufacturing

Processing and packaging facility imagery — authenticity and location not yet confirmed.

FIELD	STATUS
Processing equipment	Imagery available PARTIAL
Packaging & private-label capability	PENDING

Product Portfolio

Cat Litter

Natural mineral litter. High absorption, odor control, low dust.

Crystal Cat Litter

Silica crystal litter. Long-lasting odor control, low dust.

Quartz

Silica mineral. High purity, consistent quality. 25 kg.

Calcium Bentonite

Natural mineral clay. High swelling capacity. 25 kg.

Mabel Gel+

Ohmic resistance reducer – grounding/earthing compound. 25 kg.

Descriptions copied directly from packaging artwork. Formal TDS/SDS/COA per product still pending — see Quality & Lab Data.

Industries Served

Based on the current product range, two broad markets are implied. These are targeted markets, not confirmed customer relationships.

PET SPECIALTY RETAIL

Cat Litter and Crystal Cat Litter align with the project’s named priority buyer targets:

Pet Valu · Pet Supplies Plus · Costco · PetSmart · Chewy · Phillips Pet Food & Supplies · Pet Food Experts

All prospects. No retailer or distributor agreements are on file.

INDUSTRIAL & ENERGY

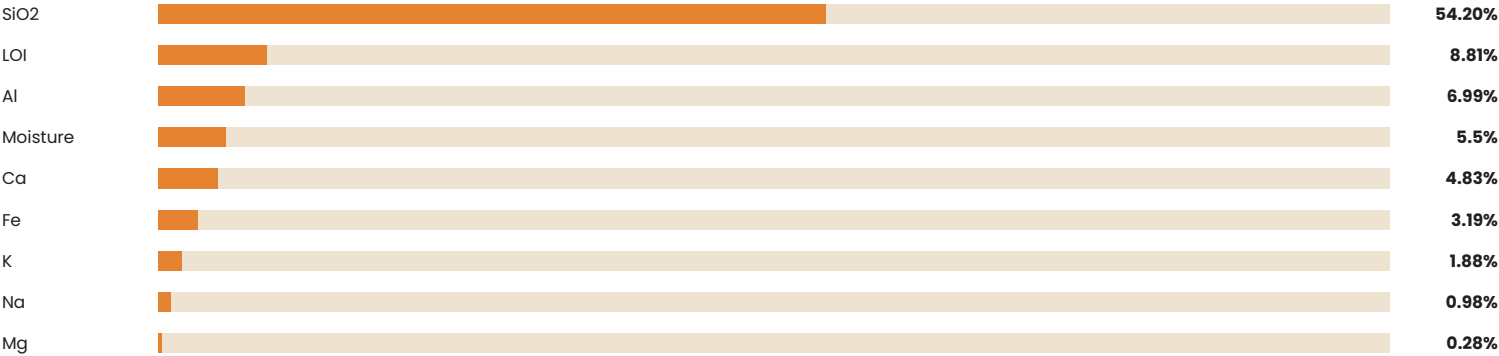

Quartz, Calcium Bentonite, and Mabel Gel+ (a grounding/earthing compound) suggest relevance to industrial distributors and engineering/energy companies, consistent with the Creative Brief’s target list.

No named industrial relationships are confirmed.

Quality & Lab Data

08

Alex Stewart International Chile (ISO 17020 / ISO 9001 accredited), Certificate No. 317_2026 — calcium bentonite sample (ref. Bentonita Lote 05122025).
Sample received 13-07-2026; results reported 20-07-2026.

Scale approximate for visual comparison of major oxide/element percentages. Full trace-element panel available in the source lab report.

Raw multi-element mineral assay — not a formatted COA, TDS, or SDS. Particle size, bulk density, absorption capacity, dust level, pH, and shelf life are still pending.

Export, Private Label & Sustainability

PENDING

Export Capability & Commercial Terms

Cost/kg, cost/ton, FOB, CIF Canada/USA, MOQ, lead time, payment terms, export ports, freight partners, Certificate of Origin, Commercial Invoice, Packing List.

PENDING

Private Label

Custom branding options, custom bag capability, private-label MOQ, artwork approval process.

PENDING

Sustainability

Not referenced in any current source document, and not part of the Supplier Readiness Program checklist. Confirm whether this should be added.
